

# Prevent Nuclear War – No First Strike

To President Donald Trump:

We, the undersigned citizens of the United States, urge you to use your influence to reduce the threat of nuclear war by eliminating global stockpiles of nuclear weapons.

In this era of endless war, the risk of deployment of nuclear weapons is growing perilously, as more and more nations seek to acquire their own nuclear stockpiles.

We beseech you to pledge the United States to a *No First Use* nuclear weapons policy. We believe that your commitment to the reduction of nuclear weapons would cement your legacy as a Peacemaker for all time.
